SPECIALISTS

We prioritize maximum customization and adapt our solutions to the process already implemented. Specifically, our experience supports us in the **development of automatic equipment**, especially in

accessories for packaging with all types of trays.

Tray loaders

MODULARITY AND INNOVATION

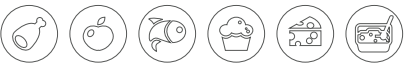

We integrate our solutions to your industrialized process or, thanks to our wide range of solutions, we create **modular chains helping to automate the process to the maximum.**

Thanks to the support of our technical service and our R+D+i departments, we offer a **high quality after-sales service** to continue supporting customers after the purchase.

Paper and plastic interleavers

Tray denesters

Unification and alignment machinery

CUSTOMIZATION AND FLEXIBILITY

Our solutions are based on standard machinery **adapted and customized** for each process, achieving equipment that is characterized by its

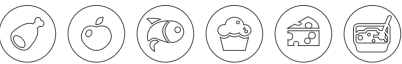

flexibility, modularity and customization.

We offer better **productivity, performance and reliability**, through the highest **innovation, customization and quality.**

Dosing systems

Labelling and weighing systems

Classifying and grouping machinery
